PROFILE

Software engineer and founder with a chemical engineering background. I help businesses build, automate and grow with technology, from web and mobile applications to AI automation and digital marketing.

EXPERIENCE

Head of Engineering Aug 2025 - Present

Buzlin Holdings Inc, Canada (remote)

- Lead all developers across the group's products and stay hands-on, from architecture and code to deployment.
- Modernised Buzlin, a multi-vendor marketplace, across seven web and mobile apps.
- Overhauled the ride-hailing apps and admin panel of BuzRyde Inc, a subsidiary, including payments and payouts.
- Added email and phone OTP login, live booking tracking and a shared support chat.
- Published the four Buzlin apps on Google Play, the App Store and the Microsoft Store, and both BuzRyde apps on Google Play and the App Store.
- Set up CI/CD and hardened API security.
- Implemented all Buzlin payments: buyers pay by mobile money in Kenya and Tanzania (PesaPal), bank through Stripe or PayPal; sellers and couriers are paid out by bank, mobile money or PayPal.
- Led development of ArtisticBuz, a hair transplant estimate and clinic referral platform, and built the group's corporate website.

Founder & Lead Software Engineer Mar 2026 - Present

Teevexa Ltd, Nairobi, Kenya

- Built Teevexa Trace, a supply chain traceability product with two apps on Google Play, now in pilot.
- Built TeeDesk, an open-source AI customer support platform for web chat, WhatsApp and Telegram.
- Built the company platform: quote funnel, consultation booking, client portal and internal CRM.
- Built IoT Custodian, a device security monitoring platform with machine-learning anomaly detection, incident management and vulnerability checks.
- Built CyberGuard AI, an open-source threat-detection dashboard.

Software Engineer Intern Jul - Sep 2025

Sensys Kenya Ltd, Nairobi, Kenya

- Supported core banking integrations using Java, Spring Boot and Temenos T24/Transact.
- Built secure backend APIs for enterprise financial systems.
- Automated data pipelines and workflows with Apache NiFi.

BUSINESS PROJECTS

- **Becof Organic Chemicals:** commerce platform with M-Pesa payments and distributor portals.
- **Esteric Kitchens & Interior Designs:** marketing website and internal CRM.
- **Melamart Enterprises:** website and equipment-hire management system.
- **Morara Home Furniture:** online furniture store (co-developed).

PERSONAL PROJECTS

- **Nyuzi:** circular-fashion marketplace with M-Pesa checkout and donation traceability.
- **Tafsiri AI:** machine translation for Kenyan languages.
- **Ordo:** project management with real-time collaboration.
